Lesson 2: National Safety Legislation and Workplace Responsibilities

Name:

Class / Group:

Date:

Student ID:

PART 1: Key Definitions

1. Primary law / Primary legislation

.....

.....

2. Implementing regulation or decree

.....

.....

3. Employer (in the safety system)

.....

.....

4. Supervisor

.....

.....

5. Workers' Safety Representative

.....

.....

6. Occupational disease

.....

.....

7. Non-compliance (with a safety requirement)

.....

.....

PART 2: True or False (Correct if false)

1. Being a learner or student means you do not need to follow workplace safety requirements.

True ■ False ■ Correction:

2. The employer can fully delegate the workplace risk assessment to any manager.

True ■ False ■ Correction:

3. The supervisor represents workers' interests on health and safety matters.

True ■ False ■ Correction:

4. Occupational insurance systems may cover occupational diseases as well as sudden accidents.

True ■ False ■ Correction:

5. If you notice an unsafe condition, you should immediately take over the employer's responsibilities and fix it yourself.

True ■ False ■ Correction:

6. Specific training is the same as general information about workplace hazards.

True ■ False ■ Correction:

PART 3: Match the Role to its Main Function

Write the correct role next to each function.

Function	Role
Holds overall legal responsibility and ensures the risk-assessment system exists	
Oversees day-to-day correct execution of work and checks instructions are followed	

Represents workers on occupational health and safety matters	
Coordinates prevention and protection activities	
Supports risk assessment and carries out occupational-health surveillance	
Organises and supervises work according to the employer's requirements	

PART 4: Workplace Scenarios

Scenario A

A new worker has received only a general site induction. The supervisor assigns him to operate a machine for which he has not received specific training. Production pressure is high.

1. Should the worker begin the task? Why / why not?

.....

2. Who has the main responsibility for organising and supervising safe work in this situation?

.....

3. What type of preparation is missing: Information, Training, or Specific training?

.....

4. What should the worker do if he is unsure how to perform the task safely?

.....

Scenario B

A technician notices a known unsafe condition that has not been corrected for several days. The authorised safe-working instruction is not being followed by some workers.

1. Is this a case of non-compliance? Explain briefly.

.....

2. What is the technician's correct action regarding authority?

.....

3. Who should the technician report the condition to in the first instance?

.....

Scenario C

A worker develops an illness that the occupational-health doctor links to repeated exposure to a harmful substance at work. A colleague says: "Insurance only covers sudden accidents, not long-term illness."

1. Is the colleague's statement correct? Why / why not?

.....

2. What is the correct term for this type of work-related illness?

.....

PART 5: Short Answer Questions

1. Explain the sequence from national law to safe work in the workplace.

.....

2. Name two responsibilities of the employer that cannot be delegated (according to the national system described).

.....

3. What is the difference between the Supervisor and the Workers' Safety Representative?

.....

4. Why must reporting of accidents and occupational diseases follow formal authorised routes?

.....

.....

Reminders: Work within your level of competence and authority. Report problems through the authorised route. Do not assume responsibilities that belong to the employer, manager or safety specialists. Submit at the next class.
